Tank Inspections

Bay Area Tank & Coatings has extensive experience performing inspections and completing compliance reports for above ground and underground storage tanks (AST/UST). **B.A.T&C** provides clients with reports and pictures documenting the work performed. All submitted compliance reports for storage tanks are filled for future reference. If deficiencies are detected on an AST or UST, **B.A.T&C** can quickly and reliably evaluate if and how the tank can be restored to be compliant with state and federal guidelines, as well as, with accepted industry standards and practice.

Menu of Services - Tank Inspection Services

Interior Storage Tank Inspections
Exterior Storage Tank Inspections
Steel Tank Institute (STI) SP-001 Inspections
American Petroleum Institute (API) 653 Inspections
National Leak Prevention Association (NLPA) 631 Inspections
Non-Destructive Testing (Ultrasonic Testing & Barcol Hardness Testing)

Tank Coatings

Bay Area Tank & Coatings has extensive experience applying external coatings to above ground storage tanks as well as secondary containments. This activity is often the result of compliance requirements from tank inspection (SP-001). **B.A.T&C** will provide guidance to clients to comply with all state and federal regulations. In regards to UST's need to exterior coatings, any required upgrades such as venting, grounding, liquid level

alarms, overfill alarms, and secondary containment repair.

Tank Linings

storage tanks. In fact, there are not many tank repair scenarios that we have not encountered. **B.A.T&C** provides extensive documentation to our clients to ensure complete tank compliance with state and regulatory regulations.

Bay Area Tank & Coatings has decades of experience performing above ground and underground storage tank cleanings, inspections, and installations of EPA approved high-build epoxy tank lining systems. **B.A.T&C** has three generations of experience as a family owned and operated service contractor for above ground and underground

Tank Repair

Bay Area Tank & Coatings is built from 80 years of experience in above ground and underground storage tank lining, inspection, and repair, and regarded as industry experts in regulatory compliance, safety, and installation of lining and coating systems. **B.A.T&C** repairs a wide variety of single-walled, double-walled, fiberglass and steel above ground and underground storage tanks.
